Top Mount Bucket Fork Kits for All Loaders and Backhoes

- ✓ **Attaches in seconds without tools**
- ✓ **No hardware needed**
- ✓ **High strength, high carbon, fully forged steel**
- ✓ **Adjustable fork spacing**
- ✓ **Increases machine versatility**
- ✓ **Heavy Duty, larger mounting shafts**
- ✓ **Fits all types of loaders**
- ✓ **Load capacity from 1500# to 28000#**
- ✓ **Available in 14 sizes**
- ✓ **Kit includes: 2 forks, 1 shaft & mounting brackets**
- ✓ **Extra mounting brackets available for using forks with other units**

These forks will increase the versatility of your bucket loader or backhoe. They will help you move many types of loads: pipe, lumber, bricks, blocks, sheeting, roofing, tile, and other palletized loads.

Arrow has supplied forks to the material handling industry for over 30 years. Arrow stocks more forks in one location than anyone else in the U.S.A. and ships over **4 million pounds of forged forks every year.**

All Arrow forks are inspected by magnetic particle, dye penetrant or sonic testing. Stock fork orders are shipped the same day. Specialty forks are shipped in 10 days or less.

Top Mount Bucket Forks for All Loaders & Backhoes

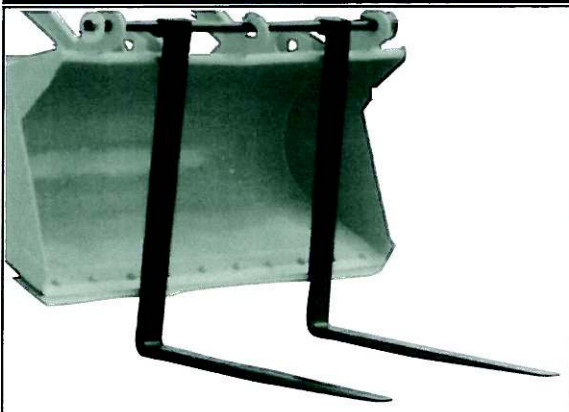

AMH forks are made of high strength, high carbon, fully forged steel. Most competitive bucket forks are mill rolled mild steel or fabricated channel steel.

ATTACH IN SECONDS

Just roll the bucket down and pick up the forks. Rotate the bucket back until the back of the forks rest against the bucket. This procedure locks the forks in place on the brackets. Forks are free standing when they are removed from the bucket.

MANY USES - MANY SIZES

Increased versatility - move many types of loads: pipe, lumber, bricks, blocks, sheeting, insulation, roofing, tile and other palletized loads.

All Arrow forks meet & exceed
industry standards:
ASME B56.11.4 & ISO 2330

BUCKET FORKS KITS
